Frequency of Drop-in Advising Appointments by Date (Jan. 1 - March 11, 2026)

Advising Demand Trends Analysis for Winter 2026:Conclusions

- Scheduled appointment demand started remained steady longer than autumn, running between week 2 and week 7, jumping towards the end of week 5 to coincide with the start of spring registration. Demand slowed in March as schedules became confirmed and classes filled.
- As with other quarters, drop-in demand starts high, then dips (likely replaced by scheduled advising) between weeks 2 and 6, spiking to coincide with spring registration demand.
- Demand in winter was even for in person vs. remote scheduled appointments: 51-48. More students preferred in-person drop-in advising than remote.
- The middle of the week sees the most demand for service: Tuesdays and Thursdays are the most popular days for seeking adviser support.
- No correlation with cancellations and appointment types: in-person appointments were cancelled at roughly the same rate as virtual. People did no-show more readily for virtual appointments (2:1 ratio), but numbers were not huge; technical issues may be to blame.
